Guidance

1. What was the business challenge you faced?
   a. Where were your gaps/need?
   b. What impact did these challenges have on your business? Why did you need to solve them?
2. What were the technical challenges you faced?
   a. What technology or lack of technology was not working prior to InfluxDB? What specifically was not effective and why?
   b. If migrating from another solution, what was the other solution and why was it insufficient?
   c. What environment are you using? What other technologies? What time series data are you collecting and from what sources?
3. What solution did you create using InfluxDB? Include an architecture diagram.
   a. What are the individual components of your solution and how do they work together?
   b. Describe your data pipeline. How does this pipeline impact the way you use that data?
4. What was the result of building this solution?
   a. How do you measure success?
   b. How did your operation improve after implementing InfluxDB? Please provide numbers/evidence.
   c. What can you do now that you couldn't do before?
5. (Optional) Are there any next steps you anticipate taking with InfluxDB?
   a. Now that you have InfluxDB implemented, are you planning any additional changes or improvements? If so, what are they? E.g., Connecting to new sources, deploying edge devices, incorporating AI/ML for advanced analytics, etc.

Behind the Scenes of Nexus BMS for Smart Buildings

InfluxDB 3 Hackathon 2nd Place Winner
